Experience

Career

Fullstack Web Developer

Emberpoint • Japan • Full time
July 2024 – Present

Developed and maintained web applications using Ruby on Rails within a fully remote, international team of Japanese engineers.
Contributed to scalable system architecture, ensuring high performance and maintainability.
Implemented clean code practices, resulting in improved code quality and reduced technical debt.
Played a key role in migrating from Ruby on Rails to Golang, improving system performance and scalability.
Supported database migrations related to AWS RDS, MySQL, and PSQL, ensuring seamless data transition.

Fullstack Mobile Developer

Viska • Iceland • Part time
March 2025 – October 2025

Spearheaded the integration of AI capabilities into the mobile application to enhance user experiences.
Developed a recommendation engine based on user preferences and historical data using AI algorithms running within Supabase functions.
Utilized AI text vectorization techniques to optimize recommendation accuracy and relevance.
Created cross-platform mobile applications for iOS and Android using React Native, focusing on user-centric design and optimal performance.
Managed mobile UX and API integration to ensure performance and stability.

Fullstack Web Developer

Corenglish • Spain • Full time
October 2022 – December 2024

Delivered a diverse portfolio of fullstack web applications, including eCommerce platforms, learning management systems, and company websites for international clients.
Managed both frontend and backend roles in international collaborations, ensuring seamless project execution and client satisfaction.
Collaborated within a team to build a comprehensive learning system.
Independently developed and maintained over 5 websites as a solo fullstack developer, including landing pages and eCommerce platforms.
Integrated Google Analytics, providing valuable insights into website performance and user behavior.

Fullstack Web Developer

Indosoft • Malang, Indonesia • Full time
(On-site: 2021–2023, Remote: 2023–2024) | February 2021 – July 2024

Developed custom WordPress solutions using PHP and Gutenberg (JavaScript/TypeScript/React), contributing to the evolution of content management systems.
Assisted the Django team with backend development tasks, demonstrating versatility and collaborative skills.
Provided UI design and implementation support to the .Net team, leveraging UI/UX skills to enhance user experience.
Collaborated with US-based teams to develop and deploy platforms for US clients, fostering international project collaboration.
Supported HR in the hiring process by creating technical interview tests and providing recommendations based on candidate technical skills.
Built custom content management solutions and contributed to backend development, improving system efficiency and functionality.
Supported other teams with architecture guidance and collaboration.
Integrated Salesforce, enhancing customer relationship management capabilities.

Frontend Developer

Levelup • Bandung, Indonesia • Full time
October 2019 – January 2021

Focused on frontend development while contributing to backend integration tasks, ensuring smooth application functionality.
Collaborated closely with design teams to explore and implement UI/UX best practices, resulting in improved user satisfaction.
Served as Project Manager PIC during periods of low frontend workload, demonstrating leadership and project management skills.
Built responsive user interfaces and reusable components using modern JavaScript frameworks, improving development efficiency.
Collaborated closely with backend developers to ensure seamless data flow and optimized application performance.
